APPLICANT: Griffais, R.

ITILE OF INVENTION: Chlamydia pneumoniae genomic sequence and polypeptides, fragments
TITLE OF INVENTION: thereof and uses thereof, in particular for the diagnosis, preve
TITLE OF INVENTION: and treatment of infection
FILE REFERENCE: 9710-003-999
CURRENT APPLICATION NUMBER: US/09/198,452A
CURRENT FILING DATE: 1998-11-24
NUMBER OF SEQ ID NOS: 6849
LENGTH: 20
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                ò

GENERAL INFORMATION:
APPLICANT: Ian Popoff
APPLICANT: Jacqueline Wyatt
TITLE OF INVENTION: ANTISENSE MODULATION OF DAMAGE-SPECIFIC DNA BINDING PROTEIN 2, P48
TITLE OF INVENTION: EXPRESSION
FILE REFERENCE: RTS-0214
                  APPLICANT: Brenda F. Baker
APPLICANT: C. Frank Bennett
APPLICANT: C. Frank Bennett
APPLICANT: C. Frank Bennett
APPLICANT: Jacqueline Wyatt
IITLE OF INVENTION: ANTISENSE MODULATION OF INHIBITOR OF DNA BINDING-1 EXPRESSION
FILE REFERENCE: RTS-0149
CURRENT APPLICATION NUMBER: US/09/561,497
CURRENT PILLING DATE: 2000-04-28
NUMBER OF SEQ ID NOS: 88
LENGTH: 20
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Sequence 81, Application US/09561497

US-09-071-845-1683/C
Sequence 1683, Application US/09071845
Patent No. 6132967
GENERALI INFORMATION:
APPLICANT: Susan Grimm
APPLICANT: Dames McSwiggen
APPLICANT: Sean Sullivan
APPLICANT: Sean Sullivan
APPLICANT: Reneth G. Draper
TITLE OF INVENTION: DISEASES OR CONDITIONS
TITLE OF INVENTION: DISEASES OR CONDITIONS
TITLE OF INVENTION: INTRACELLULAR ADHESION
TITLE OF INVENTION: MOLECULE-1 (1-CAM-1)
NUMBER OF SEQUENCES: 2390
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     0; Mismatches

Sequence 147, Application US/09387341

Parent No. 6410323

GENERAL INFORMATION:

APPLICANT: Roberts, M. Luisa

APPLICANT: Roberts, Lex M.

TITLE OF INVENTION: Antisense Modulation of Human Rho Family Gene

TITLE OF INVENTION: Expression

FILE REPRESENCE: ISPH-0404

CURRENT APPLICATION NUMBER: US/09/387,341

CURRENT PILING DATE: 1999-08-18

EARLIER PELICATION NUMBER: 09/156,979

EARLIER PRILOGATION NUMBER: 09/156,007
